

CASE STUDY: Campus Uplift

Project Overview

Technology: Networking (1700

Routers/Switches)

Market: Education

Project Duration: 10 Months

Number of Locations: 227 Campus Locations

Customer Challenge

One of the largest national universities was faced with the task of upgrading their network technology. This upgrade process included: site surveys, network planning, wireless planning, routers/switches, and cabling. In addition, the project required a partner capable of thoroughly training each delivery team to insure that all of the upgrades were completed in a timely, uniform, and consistent manner.

Worldlink Solution

- detailed site survey visit with pictures and serial/model numbers
- de-installation and disposition of existing networking equipment
- equipment installation, testing, and turn-up
- onsite CCNA Network Technicians to assist with upgrade/configuration of routers and switches
- detailed post installation documentation with pictures and serial/model numbers
- participation in weekly team management meetings

Customer Testimonial

“The improvement to the...student experience has been immense and everyone should be proud of what was accomplished. I want to thank every one of you for your hard work, long nights and dedication...It was an amazing thing to watch and I’m really proud of the entire team.”

G.M.- Senior Manager
