

CASE STUDY: Retail EMS Upgrade

WORLDLINK INTEGRATION GROUP

Project Overview

Technology: Energy Management

Market: Retail- Broadline Retailer

Project Duration: 5 Weeks

Number of Locations: 68

Customer Challenge

The largest Broadline Closeout retailer in the US needed to augment their EMS system to accommodate current and future energy management needs. They contracted with their current EMS provider, one of the world's largest, who in turn reached out to their internal teams and external partners to upgrade their systems throughout the US. Worldlink, a certified partner, was chosen to assist with select locations.

Worldlink Solution

- inventory management of all equipment
- equipment staging and kitting
- equipment installation, testing, and turn-up
- commissioning of system
