

CASE STUDY: Sporting Goods AP Refresh

WORLDLINK INTEGRATION GROUP

Project Overview

Technology: Wireless Access
Points

Market: Retail—Specialty Store

Project Duration: 4 weeks

Number of Locations: 150

Customer Challenge

A large sporting goods retailer was faced with the task of identifying a technology partner who had the ability of upgrading the WAP's in all of their stores. We installed new upgraded WAP's and mapped their locations in the store. Additionally, they were connected to the existing POE switch and tested with the IT department.

Worldlink Solution

- Inventory management of all equipment
- Equipment installation, testing, and turn-up
- De-installation and disposition of existing equipment
