

CASE STUDY: Wireless Connectivity

WORLDLINK INTEGRATION GROUP

Project Overview

Technology: Network Systems

Market: Banking- ATMs

Project Duration: 6 Weeks

Number of Locations: 200 California

Customer Challenge

A large credit union was faced with the task of identifying a technology partner capable of upgrading their ATM wireless connectivity within a 6 week period.

Worldlink Solution

- received all required equipment: staged, configured and delivered to each location
- performed onsite upgrade/retrofit of applicable existing routers
- replaced existing routers where required
- placed and tested wireless internet cards
- installed additional antennae- external and internal where required
- inventory and packaging of old equipment for de-commissioning
